CALIBER MINING AND LOGISTICS LIMITED · PULSE-II · OPERATIONS

Batch Status & Turnaround

Operating manual

For site in-charges, MIS staff and reviewers · Matches the system as of 11 November 2026

1. What this report shows

This report shows where every shift stands in batch entry: batch not created, VLB open, LMV open, ELB open or locked. It also shows how many hours each stage took and how much of that time was actual work on the website. Site in-charges and the MIS team use it to find pending shifts and slow stages.

> **One row.** In Step 1 one row is one site. In Step 2 one row is one shift of one date. In Step 3 one row is a milestone or a stage of one batch. In Step 4 one row is one recorded action in that batch.

2. Open the report and choose what to see

In the left menu open **Reports** → **Operations** → **Batch Status & Turnaround**. Then set the selectors described below.

Selector or button	What it does
1. From	First date of the period. It cannot be before 01-11-26.
2. To	Last date of the period. The period can be at most 31 days.
Show report	Reads the batches again for the chosen dates. The report also opens by itself with the current month up to today.

3. What is on the screen

On the screen	What it shows
REPORTS / OPERATIONS	The page heading, with the title “Batch Status & Turnaround” under it.
All sites › (site) › (batch) › (stage) actions	The step trail. It shows which step is open. Press an earlier name to go back to that step. The violet Back button at the start of this line, and the one beside Search this report, go back one step; while a step is open, the round back arrow at the top of the page does the same. Long column headings are written on two lines. Drag the right edge of a column heading to make the column wider or narrower, double-click the edge to fit it again; Reset table under Actions puts every column back.
Yellow box	One to four lines in plain words worked out from the table below it, for example how many shifts are not yet locked, which site is at rank 1 and which is last, and how many of today's shifts are already counted.

Live now · (number) working	A small table above Step 1: one line for each person who saved something in a batch in the last 10 minutes, with the site, the shift, the stage they are working in (VLB, LMV or ELB), how many saves they made in those 10 minutes and how long ago the last one was. It reads again every minute while the page is on screen, and stops while the browser tab is hidden. Press a line to open that site in Step 2. When nobody is saving, it says so.
Step 1 · All sites · (dates)	One line per site, the best site first, and a last line ALL SITES. The coloured edge and the coloured Rank, Done and Performance show the rating: green for Good, orange for Average, red for Poor. Press a site to open Step 2 for that site. Press ALL SITES to see the shifts of every site together.
How this report counts	Press to read the counting rules used on this page.
All shifts · Locked · Batch not created · VLB open · LMV open · ELB open	Buttons above Step 2, each with its number of shifts. Press one to list only the shifts at that stage.
Step 2 · (site) · shift by shift · (dates)	One line per shift. The coloured edge is green for Locked, red for Batch not created and orange for an open stage. Press a line that has a batch to open Step 3.
Step 3 · (batch name) · timeline	The milestones of the batch in order: Shift ended, Batch created, VLB locked, LMV locked, Batch locked.
Time taken in each stage	VLB, LMV, ELB and Whole batch. Press a stage to open Step 4 with the actions of that stage; press Whole batch for every action.
Rework in this batch	How many times the batch was unlocked, reopened or changed after saving.
Step 4 · (batch name) · (stage) actions	Every recorded action in time order. An orange row is a gap longer than 10 minutes, counted as waiting.

4. The columns

Column	Meaning
Step 1 · Rank	Position of the site by Done (% of shifts due). Rank 1 is the best. Sites with the same percentage have the same rank. ALL SITES has no rank.
Step 1 · Site	Site name.
Step 1 · Working now	How many people saved something in a batch at this site in the last 10 minutes, and their names, for example 2 · Ramesh Kumar, Sunil. A dash when nobody did. Someone checking a card without saving it appears once they save. ALL SITES shows the total number of people.
Step 1 · Last action	How long ago anyone last saved something in a batch at this site, within the last 24 hours, for example 3 min ago. A dash when there was no save in the last 24 hours.
Step 1 · Shifts due	Shifts of the period whose end time has passed. A shift of today is added the moment it ends, so this number grows during the day. A site is counted from the date of its first batch.

Step 1 · Of which today's shifts	How many of today's shifts have ended and are already counted in Shifts due, for example 1 of 3. A dash when the period does not include today.
Step 1 · Locked	Shifts whose batch is locked (closed).
Step 1 · Done (% of shifts due)	Locked as a percentage of Shifts due.
Step 1 · Performance	Good (green) when Done is 50% or more, Average (orange) from 25% to 49%, Poor (red) below 25%.
Step 1 · Balance	Shifts due minus Locked. It equals Batch not created + VLB open + LMV open + ELB open.
Step 1 · Batch not created	Shifts for which no batch exists.
Step 1 · VLB open	Batches still in the VLB stage: trip cards are being entered or VLB is not locked.
Step 1 · LMV open	Batches where VLB is locked and LMV is not yet locked.
Step 1 · ELB open	Batches where LMV is locked and the batch is not yet locked.
Step 1 · Oldest pending shift	Date and shift of the oldest shift that is not locked.
Step 1 · Locked within 24 hours	Out of the locked shifts, the share locked within 24 hours of the end of the shift.
Step 1 · Average hours, shift end to locked	Average hours from the end of the shift to the time the batch was locked. Shown in red when above 24.
Step 1 · Slowest stage	The stage (VLB, LMV or ELB) with the highest average clock time among the locked batches, with that average in hours.
Step 1 · Unlocked or reopened (times)	How many times VLB was unlocked or a batch was reopened.
Step 2 · Site	Shown only when ALL SITES is open.
Step 2 · Date	Date of the shift.
Step 2 · Shift	Shift 1, Shift 2, Shift 3, Day shift or Night shift.
Step 2 · Stage now	Batch not created, VLB open, LMV open, ELB open or Locked.
Step 2 · Working now	Names of the people who saved something in the batch of this shift in the last 10 minutes, with the stage they are working in, for example Ramesh Kumar (VLB). A dash when nobody did.
Step 2 · Pending for (hours since shift ended)	For a shift that is not locked: hours from the end of the shift until the report was taken.
Step 2 · Wait before batch created (hours)	Hours from the end of the shift to the time the batch was created.
Step 2 · VLB stage (hours)	Hours from batch created to VLB locked.
Step 2 · LMV stage (hours)	Hours from VLB locked to LMV locked.
Step 2 · ELB stage (hours)	Hours from LMV locked to batch locked.

Step 2 · Shift end to locked (hours)	Hours from the end of the shift to batch locked. Shown in red when above 24.
Step 2 · Work on website (hours)	Actual working time: the gaps between one recorded action and the next, counting only gaps up to 10 minutes.
Step 2 · Trip cards saved	Saved trip cards in the batch.
Step 2 · LMV log books saved	Saved LMV log books of that site, date and shift.
Step 2 · Machines saved	ELB machine entries saved out of the machines in the batch list, for example 6 of 6. Shown after LMV is locked.
Step 2 · Unlocked or reopened (times)	How many times VLB was unlocked or the batch was reopened.
Step 2 · Entered by	Login of the person who created the batch.
Step 3 timeline · Milestone	Shift ended, Batch created, VLB locked, LMV locked or Batch locked.
Step 3 timeline · When	Date and time in India time. A dash means the milestone is not reached.
Step 3 timeline · Done by	Login of the person who did it.
Step 3 timeline · Hours since previous milestone	Hours from the milestone before it.
Step 3 timeline · Hours since shift ended	Hours from the end of the shift.
Time taken in each stage · Stage	VLB, LMV, ELB or Whole batch.
Time taken in each stage · Clock time (hours)	Hours by the clock from the start of the stage to its lock.
Time taken in each stage · Work on website (minutes)	Minutes of actual work in the stage: gaps between actions up to 10 minutes.
Time taken in each stage · Waiting (hours)	Clock time minus work on website.
Time taken in each stage · Items saved	Trip cards, LMV log books or machine entries saved in the stage.
Time taken in each stage · Minutes of work per item	Work on website divided by Items saved.
Rework in this batch · Rework in this batch	The kind of rework.
Rework in this batch · Count	How many times it happened.
Step 4 · Sr	Serial number in time order.
Step 4 · Time	Date and time of the action in India time.
Step 4 · Stage	Batch, VLB, LMV, ELB or Rework.

Step 4 · Action	What was done, for example Trip card saved, VLB locked or Machine entry saved.
Step 4 · Item	The card number and door, the LMV log book number or the machine, where recorded.
Step 4 · Done by	Login of the person who did it.
Step 4 · Gap from previous action (minutes)	Minutes since the action before it in the batch.
Step 4 · Working time (minutes)	The gap when it is 10 minutes or less; 0 when it is longer.
Step 4 · Remark	“Waiting: gap above the idle limit” when the gap is longer than 10 minutes.

5. Keep in mind

- The website records the time of every save and lock, not how long a page stayed open. Work on website is therefore worked out from the gaps between recorded actions.
- If VLB was unlocked or a batch was reopened, the stage times shown are the final lock times. Step 4 lists every lock and unlock.
- Batches locked before the VLB, LMV and ELB stages were introduced have no stage lock times; their stage hours show a dash.
- Deleted batches and batches removed from the batch list are not counted.
- A shift whose end time has not passed is not yet due and is not listed, unless its batch already exists.
- Shift end times come from the Shift Master of the site. Without a Shift Master entry, Shift 1, 2 and 3 are taken as 05:00-13:00, 13:00-21:00 and 21:00-05:00.
- Working now counts saves, not open pages: a trip card, an LMV log book, a machine entry, a lock or an unlock in the last 10 minutes. The same 10 minutes separate work from waiting in Work on website. Working now, Last action and Live now read again every minute while the page is on screen; the rest of the report changes only when you press Show report.

6. Download, print and search

- Tables on this page have a **Generate** button: **Download as PDF**, **Download as Excel** or **Smart Print**. The file contains the whole table, not only the rows visible on screen.
- Type in **Search this report** to find a door number, driver or card inside a table.
- Press a column heading to sort by that column.
- If the page looks old after an update, press **Ctrl + F5** once.

7. Review checklist

Step	Do this
1	Choose the dates and press Show report.
2	In Step 1, read the yellow box, then check Rank, Done and Performance of each site; the red sites need attention first.
3	Check Balance and Oldest pending shift of each site.

4	Open a site and press Batch not created to list the shifts that still need a batch.
5	For locked shifts, look for red in Shift end to locked (hours) and see which stage took the most hours.
6	Open a slow batch and compare Clock time with Work on website to see whether the time went in work or in waiting.
7	Open Step 4 to see the exact gaps.

> **This manual shows how to read and verify the report.** What action to take on its findings is as instructed by management.

8. Common questions

Question	Answer
Why is Work on website much smaller than Clock time?	Clock time includes breaks and waiting. Work on website counts only gaps of 10 minutes or less between two recorded actions.
A shift is missing from Step 2. Why?	Its end time has not passed yet, or the date is before the first batch of that site.
Why does a locked batch show dashes in the stage hours?	It was locked before stage lock times were recorded, or the lock time is not available in its history.
Can I change anything from this report?	No. It only reads. Batches are entered, locked and reopened from the VLB and ELB pages.
